

Qdabra's MyForms Web Part

Qdabra's MyForms web part allows you to set up a web part page which displays the xml forms stored in DBXL. The end product is similar to a data view (documented [here](#)), but creating a data view requires installing SharePoint Designer. The MyForms web part allows you to create a web part page quickly and without having to install SharePoint Designer.

MyFormsWebpart				
SampleForm				
	ID	Document	Author	Description
	265	2011-05-13	John Doe	business trip 5/1/2011
	266	2011-05-13	Michael Smith	business dinner

DEPLOY THE WEBPART TO SHAREPOINT 2007

- A. Copy Web Part Binaries.
 1. Click on **Start > Run**.
 2. Enter **inetmgr** in the **Open** dialog box and click **OK**.
 3. Expand the machine name (Local Computer) and then expand **Web Sites**.
 4. Go to **SharePoint (80)** and click on **Open** to go to the appropriate directory.
 5. Create a directory with the name **bin** and copy **Qdabra.Dbxl.WebParts.MyForms.dll** (located in C:\Inetpub\wwwroot\wss\VirtualDirectories\80\QdabraWebService\extras) into that folder.
 6. Right click **bin** and choose **Open**.
- B. Modify web.config:
 1. Open explorer and navigate to **c:\inetput\wwwroot\virtualdirectories\80\QdabraWebService** and open web.config.
 2. Add the Safe control line:

```
<SafeControl Assembly="Qdabra.Dbxl.WebParts.MyForms, Version=2.0.0.1, Culture=neutral, PublicKeyToken=3af9aaaa5e0e3242" Namespace="Qdabra.Dbxl.WebParts.MyForms" TypeName="*" Safe="True" />
```
 3. Save web.config.

4. Click on **Start > Run** and enter **inetmgr** in the open dialog box. Click **OK**.
5. Go to SharePoint (80) and click **Restart** in the **Manage Web Site** section of the taskpane. This resets the IIS process and forces the changes to be processed. You can also run **iisreset** from a command prompt.
- C. Add the webpart to the Global Assembly Cache for the local computer by simply dragging and dropping the Qdabra.Dbxl.WebParts.MyForms.dll from **C:\Inetpub\wwwroot\wss\VirtualDirectories\80\bin** to **C:\WINDOWS\assembly**.
- D. Add the DBXL My Forms Web part to the SharePoint Web Part Gallery:
 1. Open your SharePoint site by entering URL **http://servername** in Internet Explorer.
 2. Click **Site Actions** at the top left of the page, select **Site Settings**, and select **Modify All Site Settings**.
 3. Click **Web Parts** under **Galleries** column.
 4. Click **New**.
 5. Scroll down and check **Qdabra.Dbxl.WebParts.MyForms.MyFormsWebPart**.
 6. Scroll back up and check **Overwrite File if It Already Exists**.
 7. Click **Populate Gallery**.

USING THE MYFORMS WEBPART

- A. Add the new MyFormsWebPart to a page
 1. Click on **Site Actions** and then click on **Create**.
 2. Click on **Web Part Page** under **Web Pages**.
 3. Enter the name of the new web part page.
 4. Under **Choose a Layout Template** select **Full Page, Vertical** and then click the **Create** button.
 5. Click **Add a Web part**.
 6. Under the Miscellaneous category, select the checkbox for MyFormsWebPart and then click the **Add** button.
- B. Configure the My Forms Web Part
 1. In the MyFormsWebPart title bar click **Edit** and then click **Modify Shared Web Part**.
 2. In the taskpane, enter the **Web Service URL** to the correct URL for your instance of DBXL (**http://<servername>/QdabraWebService/DbxlDocumentService.asmx**). Click **Apply**.
 3. In the taskpane, select the **Document Type** from the dropdown. Click **OK**.

Document Type

Web Service URL:

Document Type:

4. Click on **Edit** in the MyForms Web part and click **Modify Shared web part**.
5. Click on the + sign next to **Appearance** and change the value in the Title text box as desired.

6. Scroll up to the Column Display Selector area and uncheck all the checkboxes for the columns you do not want to see. Change the ordering of the columns as desired and click OK when finished.
7. To test the web part, submit a few documents to your Document Type, and then navigate to the location where you added the MyFormsWebPart.
