

HOW TO ENABLE SHAREPOINT WORKFLOW FOR DBXL FORMS

PRODUCT: DBXL v2.4 or newer
LAST UPDATED: June 30, 2011

When using SharePoint workflow on a DBXL Document Type that is mapped to SharePoint, some changes are needed in DBXL's web.config file. Please follow these steps:

1. Open web.config for the SharePoint site.
2. Open the DBXL web.config, which is located in the QdabraWebService folder.

These files can be opened in a text editor such as Notepad.

3. Find the following section in the SharePoint web.config:

```
<sectionGroup name="System.Workflow.ComponentModel.WorkflowCompiler" type="System.Workflow.ComponentModel.WorkflowCompiler" data-bbox="148 457 877 521">
  <section name="authorizedTypes" type="System.Workflow.ComponentModel.WorkflowCompiler" data-bbox="148 457 877 521">
  <section name="authorizedRuleTypes" type="System.Workflow.ComponentModel.WorkflowCompiler" data-bbox="148 457 877 521">
</sectionGroup>
```

4. Copy that section.
5. Switch to the DBXL web.config and paste before </configSections>, as shown below.
